

UF DEPARTMENT OF RADIOLOGY INTERVENTIONAL RADIOLOGY INDEPENDENT RESIDENCY PROGRAM

Mission

Our mission is to develop interventional radiology leaders, scholars, and clinician-educators who are compassionate, provide excellent health care, and are ready for any career opportunity and challenge. We hope to accomplish this through mentoring, educational opportunities both within and outside our institution, and in an environment that promotes personal well-being.

About Us

UF Interventional Radiology Independent Residency offers subspecialty training in interventional radiology designed to equip physicians with the training needed to excel in careers in academic or private practice. Our program offers high degrees of progressive autonomy with an emphasis on patient safety and high-quality care. This is achieved through high-volume, focused training in a well-rounded scope of modern interventional radiology. Fellows will be first operator on the vast majority of cases throughout training. Example procedures fellows will master include: the performance of Y90 mapping and administration procedures, complex trauma embolization procedures, tumor ablation procedures, and TIPS placements.
